```

```
Accessing componenets of a list
```

- To access top level componenets,
use single slicing operator "["
- For sub level / inner level componenets us
followed by another "]"

```
"""
```

```
roll_no = [1,2,3,4]
```

```
student_name = ["Ram","Shyam","Sita","Gita"]
```

```
stud_no = 4
```

```
student_list = [roll_no,student_name,stud_no]
```

```
#Accessing componenets of a List
```

```
print(student_list[0]) # [1, 2, 3, 4] roll_no
```

```
print(student_list[0][1]) #
```

```
print(student_list[1][1]) # Shyam
```

```
print(student_list[1][1][2]) # y
```
